

BAHAMAS NATIONAL TRUST

CUBAN PIG ROAST

Join us at this year's Cuban Pig Roast and become a supporter of Bonefish Pond National Park and the BNT's vision for its future. This critical mangrove ecosystem is the last intact habitat of its kind in New Providence - protecting nearby communities from storm surges; supporting local industries; serving as a nursery for economically and culturally significant species like Spiny Lobster, grouper, and conch; and helping to reduce carbon emissions. This invaluable natural gem offers untapped potential as a hub of recreational, educational, and tourism opportunities on the island. A welcome center at Bonefish Pond National Park will increase access for visitors and allow the BNT to capitalize on the unique opportunities it presents.

Pig Roast 2025 invites you to become a steward of Bonefish Pond National Park and a driving force in realizing its full potential. In doing so, you'll be supporting the preservation and sustainable advancement of a fragile but critical ecosystem; one that benefits Bahamians and visitors alike and serves local communities.

A welcome centre is only a stepping stone on the path towards an exquisite future for Bonefish Pond National Park. Your participation and engagement at Pig Roast 2025 will be instrumental in its success

Join us in our mission to safeguard and celebrate our natural wonders for future generations.
